**CORRECTION: Product NDC Change for Metronidazole Injection, USP
500 mg/100 mL (5 mg/mL) Flexible Container**

Dear Valued Customer,

Pfizer Hospital would like to correct a prior communication announcing the NDC change for Metronidazole Injection, USP 500 mg/100 mL (5 mg/mL) Flexible Container. While the active ingredient is the same in both NDCs, the purpose of this letter is to clarify that there are differences in the product formulation and the label, as detailed in the table below.

Due to ongoing market shortages and associated increased demand, Pfizer accelerated the launch of the NDC in February 2022. As a result, the new NDC is already in the market, however both NDCs will remain in the market temporarily. Wholesaler numbers and ordering information for the new NDC are provided below for your convenience.
