Product NDC and Vial Presentation Change for DOXOrubicin Hydrochloride Injection, USP, Multiple Presentations

Dear Valued Customer,

Pfizer Hospital is pleased to share the NDC and vial presentation changes for **DOXOrubicin Hydrochloride Injection, USP 10 mg/5 mL (2 mg/mL) Single Dose Vial** and **DOXOrubicin Hydrochloride Injection, USP 20 mg/10 mL (2 mg/mL) Single Dose Vial** are now available at distributors and wholesalers (please note locational inventory may vary).

While there are differences in NDCs, labels and vial presentations, as detailed in the Product Information table below, please note there is no change to unit of use prices, unit of sale sizes or indications.

Please keep in mind that as we transition to the new NDCs, 0069-0358-20 and 00069-0277-02, both labels will be in the marketplace temporarily. However, until depleted, we request that you continue using the following NDCs, 00069-3030-20 and 00069-3031-20.

340B INVENTORY REPLENISHMENT

Pfizer recognizes that a product transitioning to a new NDC number can impact product inventory accumulations for 340B covered entities. The Product Table below outlines both the existing and new NDCs. Because the new NDC is for the same product (drug, dosage form, and package size), and has the same 340B price as the corresponding existing NDC, eligible 340B covered entities may use a 340B compliant inventory replenishment model to transfer accumulations of the old NDC toward replenishment of equal quantities of the corresponding new NDC.
