### **Expanding our U.S. Distribution Footprint with the Opening of the Las Vegas Logistics Center**

Dear Valued Customer,

At Pfizer, our commitment to market sustainability is rooted in our responsibility to help ensure patients have reliable access to the medicines they depend on. To support this, we continue to invest in a strong U.S. manufacturing and distribution network—one built to support supply continuity and help ensure product is available when and where it is needed most.

As part of our continued investments in our U.S. generic sterile injectables, surgical, and biosimilars capabilities, we are pleased to announce the opening of our new, state-of-the-art Las Vegas Logistics Center, operated by DHL. **This strategic expansion is designed to enhance customer service and product delivery agility across our U.S. distribution network. Once fully operational, we will ship to several western states primarily from the Las Vegas Logistics Center, strengthening access to care to over 60 million patients in the western United States.** For customers nationwide, depending on inventory availability, shipments may also originate from the Las Vegas Logistics Center.

The Las Vegas Logistics Center adds to our already strong U.S. footprint of 4 Pfizer manufacturing sites and 3 distribution centers in Atlanta, GA (also operated by DHL); Memphis, TN; and Pleasant Prairie, WI; in addition to our robust global network. Our supply chain has been recognized by the Healthcare Industry Resilience Collaborative (HIRC), including being the first pharmaceutical company to achieve the highest-level Diamond status, demonstrating robust supply resiliency, operational maturity, and risk management processes. [Learn more about HIRC here.](#)

We look forward to serving you from this new location and thank you for your ongoing partnership. Pfizer remains committed to market sustainability through ongoing investment in a resilient sterile injectables and biosimilars supply chain, enabled by a robust U.S. and global footprint.

We encourage you to [learn more](#) about Pfizer's approach to, and the steps we can take together to help address the root causes of drug shortages.

Please direct any questions to Pfizer Customer Service at 1-844-646-4398. If proof of license is required, please contact your Pfizer Sales Representative.

Thank you,
